Tlemcen, Algeria. Tél : +213 770 774 936

Objective

To develop technologically interesting and cunningly designed applications for the web. I am particularly interested in user interface and structured framework design, and enjoy having input on all aspects of a project as suits my diverse skill set.

Areas of Expertise

Application architecture/design at the system, function and unit levels for Web-based application systems in multi-tier environments of over 200 users, multiple sites (30+) and 100+ screens, forms, and reports.

Application programming for Web-enabled and client-server systems using ASP.NET (1.1/2.0), Active Server Pages, VBScript, Java J2EE, JSP, Servlets, JavaScript, PHP, Perl, C++, PL/SQL, SQL stored procedures, HTML and others in a variety of integrated development environments.

Web and graphic design using Adobe Photoshop, Adobe Illustrator, hand-coded HTML and advanced CSS techniques. Design projects varied from corporate identity and professional web application interfaces, to public entertainment and e-commerce websites.

Data modeling and database design, integration, deployment and administration using MS SQL Server and MySQL. Databases ranged in size from simple to 200+ tables and covered data migration and conversion activities.

Technical Skills

Programming Languages

- PHP (Laravel Framework)
- HTML / CSS
- JavaScript
- NodeJS
- Angular JS
- ASP
- Python

Tools

- PHP Storm
- Sublime Text 3
- Adobe Photoshop CC / Illustrator CC
- Visual Studio
- Eclipse SDK
- Microsoft Office
- Web Servers (Microsoft IIS, Apache)
- Database Servers (SQL Server, MySQL)

Operating Systems

- Windows (7, 8 , 10)
- Linux (Ubuntu, Centos, Kali Linux)
- Android

KEY COMPETENCIES AND SKILLS

Web Development

- Knowledge of PHP, XHTML, CSS, XML and JavaScript/jQuery.
- Awareness of the Web Development industry, and new technologies.
- Social Media Monetisation Strategies.
- Developing multi-user applications within a (SOA) service orientated architecture.
- Writing up technical manuals and user instructions.
- Strategically thinking through all parts of the design process.
- Knowledge of payment processing, customs clearance and multi-currency pricing.
- Knowledge of international web standards and protocols.

Professional

- Able to organise own workload effectively and prioritise tasks.
 - Can quickly understand business requirements and then translate these into functional requirements.
 - Having a passion for customer service & responding quickly to enquiries.
 - Can manage multiple projects in a fast-paced, deadline-driven environment.
 - Adaptable and able to quickly pick up new techniques.
 - Understanding of W3C standards, web accessibility & best practice.
- Personal
- Passionate about doing a good job.

- First rate interpersonal and communication skills, able to easily interact with fellow developers and customers alike.
- Comfortable with being the ‘go to’ person in a company.
- Strongly committed to all projects from inception right through to the end.
- Confident, friendly and easy to get along with.
